Art Unit: 1621

Claims 1-8 are pending in this application.

Claim 1-8 are generic to the following disclosed patentably distinct species: compounds, for example, wherein R2 is hydrogen or carboxy. The species are independent or distinct because applicants' variously substituted compounds would not necessarily suggest each other to one skilled in the art. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Again, applicants are requested to elect a single disclosed species, **i.e. a single disclosed compound.**

A telephone call was made to applicants' attorney, Ms. Mack, on 20 November 2006, but did not result in an election.

Any inquiry concerning this communication should be directed to Peter G. O'Sullivan at telephone number (571)272-0642.
